WOULD TRAIN MEN TO BE PRODUCERS NOT DESTROYERS

Magrath Shows How Ten Million Dollars Might Be Spent Differently.

APPARENTLY STARTS DELEGATES THINKING

Get Better and Bigger Idea of Alberta and Resources Than Ever.

W. J. Magrath, president of the Edmonton Industrial association, who was perhaps the principal speaker in North America at the western Canada colonization and development convention yesterday, made one statement which greatly interested those present. Mr. Magrath spoke on "Manufacturing in Alberta—its growth and possibilities," and seemed to hit the very kernel of the colonization and development problem in the west, when he stated that if the dominion government had used the \$100,000,000 fund it appropriated for armaments to develop the live stock and distributing it among the brave young men of western Canada, thus tending to make them producers instead of destroyers, it would be much better for everyone concerned. The president of the industrial association made a very optimistic address on the future of Alberta. It opened the eyes of even a large number of those present who had already heard and seen a lot about this province, particularly when he quoted figures of the resources and the statement recently made by Dr. H. M. Tory of Alberta could supply, without outside help, the necessities of the nation. His scientific action were correctly taken. When Mr. Magrath referred to the \$100,000,000 being sunk in armaments all through the dominion to train men to destroy wealth, and of the necessity for training and helping them to produce it in bounteous Alberta and elsewhere, the delegates said that he had something to suggest in the way of a constructive policy, besides mere statements of the extent of the country's resources. Many of the delegates expressed the opinion that this part of Mr. Magrath's speech was the biggest thing the convention heard yesterday. They agreed that credits will continue today, when several other Edmontonians speak.

SEVENTH ALBERTA MUSICAL FESTIVAL

The Seventh Alberta Musical Festival opens next Tuesday morning, the 16th, at 9:00 o'clock sharp, at the First Presbyterian church on Fifth street and will continue for three days. The free use of the auditorium has been granted by the board of management and much appreciation is felt for this and also that of the Trustees of McDougall Methodist church in granting the use of their church auditorium for the two grand concerts to be held on Wednesday and Thursday evenings, the 20th and 21st inst. Last year, these delightful concerts were held in the old theatre which has since been destroyed by fire. The city offered the committee the use of the arena pavilion at the exhibition grounds but the distance was considered to be a serious handicap to a good attendance, so arrangements were made to hold the concerts in a more central place. At the beginning of the fall, it was expressed wish of the executive that the festival go to Calgary, and to that end, Messrs. Barford and Hughes visited the western cities and a delegation of Calgary musicians. After considering the matter thoroughly, it was not found possible by the Calgary people to arrange to take up the project this year, although it is hoped that the festival of 1915 will go there. The interest, however, on the part of the city, and the fact that the festival is sending up a male chorus, five male quartets and a number of solo competitors. The committee of the present year has been an energetic one, and have been faithful attendants at their weekly business meetings since the early fall. As may be understood, a large amount of real work—praise as well as artistic—needs to be done in order to produce a festival of this magnitude. The financing of such a scheme is no light matter. In this the city council came to their aid in a practical manner. The concert given by the Festival several months ago, was successful in defraying the deficit with which the committee started its year. With the gifts of medals, shields, etc., the care on all concerned has been lightened. There are many inquiries regarding the duration of the stay of Dr. Vogt and Mr. Hewlett in the city. Several organizations have plans on foot for their entertainment and by all appearances the festival will be a great success. The adjudicators will arrive on Sunday afternoon and will be in the city for several days. The festival is fully expected that Mr. Hewlett will have heard here already in respect, will give another organ recital on Friday evening in the McDougall Methodist church. The soloists of the closing number, "The Crusaders" will be Miss Bessie Ellis, Mezzo; David Jones and N. L. McPherson, who will take parts of Arnold, Rinaldo and Peter the Hermit, respectively. These singers are all favorites in Edmonton and are soloists in First Presbyterian and McDougall Methodist churches.

SENATORS MOVE TO HOIST ANTI-TIPPING BILL FOR SIX MONTHS

OTTAWA, May 15.—In the Senate, Senator Harter offered an amendment to the anti-tipping bill. It provided that restaurants, hotels, restaurants, theaters, pool hall, establishments and similar public places, notices be posted that tipping is illegal and that anyone who tips and renders himself liable to a fine of \$100 or imprisonment for a year. That would be severe punishment for anyone who tips. Senator Gordon and Senator Chubb announced their intention of opposing the six months' hold of the bill. It was stood over until Tuesday to the amendment.

WM. WAINWRIGHT VICE- PRESIDENT G.T. DIES IN ATLANTIC CITY

Montreal, May 15.—Word was received here last night of the death earlier this evening at Atlantic City of William Wainwright, vice-president of the G. T. and G. T. P. railway. Mr. Wainwright, who was 74 years of age, had been critically ill for a month from pneumonia in the head and complications. He had gone to the New Jersey resort to recuperate. Although no much improvement was seen in his condition, arrangements had been made to bring Mr. Wainwright home today. Several of his relatives were with him at the time of his death. Mr. Wainwright had been with the Grand Trunk practically from its inception and being popular with the men of all parties at Ottawa, he was entrusted with the roads interests in matters that came before parliament.

TEN MEN KILLED AND THREE ARE HORRIBLY HURT IN EXPLOSION!

Detroit, Mich., May 15.—Ten men were killed and three terribly injured in an explosion this forenoon which blew the plant of the Mexican Rubber company to pieces. There were about 25 employees working in the plant. Eleven survivors have been accounted for. Gasoline is believed to have been responsible for the explosion. Most of the victims were killed mechanically. One body was blown through the building. Three other bodies were burned beyond recognition. Three men were removed to a hospital and physicians said they did not expect any of the men to survive. Debris was piled up in the building near the Rubber Company's plant was shattered. There were several reports as to the cause of the explosion. One survivor said a vat containing a large quantity of Mexican rubber exploded. Officials of the company declined to issue a statement until they conducted an investigation. The plant, a one-story concrete building, in West Detroit, was almost obliterated. Flying chunks of substance riddled adjoining buildings and concrete blocks weighing many pounds were hurled more than two blocks. The factory of Commerce Motor Car company, about 100 feet from the rubber concern, was badly damaged. No body in the building, however, was seriously hurt. The explosion was witnessed by scores of pedestrians and there were many narrow escapes. One man told police he heard a roar—the concrete factory seemed to split in three huge pieces, two of which "melted away," the third, he said, shot high in the air, breaking in two and fragments went whizzing in every direction. The building was considered fireproof and the firemen soon prevented the possibility of a conflagration. None of the first five bodies removed from the smoking debris was identified before taken to the morgue. Several hours after the accident it was still impossible to learn definitely by the number of dead. All of the employees could not be accounted for and lost reports that possibly 14 had been killed.

SEVENTH ALBERTA MUSICAL FESTIVAL

The Seventh Alberta Musical Festival opens next Tuesday morning, the 16th, at 9:00 o'clock sharp, at the First Presbyterian church on Fifth street and will continue for three days. The free use of the auditorium has been granted by the board of management and much appreciation is felt for this and also that of the Trustees of McDougall Methodist church in granting the use of their church auditorium for the two grand concerts to be held on Wednesday and Thursday evenings, the 20th and 21st inst. Mr. Wainwright had been with the Grand Trunk practically from its inception and being popular with the men of all parties at Ottawa, he was entrusted with the roads interests in matters that came before parliament.

WILL ROUND UP WILD HORSES ON INDIAN RESERVE

Arrangements Made for Big Capture of Animals Running in South.

THREE HUNDRED HEAD WILL BE ROPED IN

Government Plans to Dispose of Them by Public Auction.

A big round up of wild and stray horses on the Blood Indian reserve in southern Alberta, commencing on Monday next has been organized. It is expected that the round-up will occupy about ten days. The Blood Indian reserve is some 1,500 square miles in extent, being about 100 miles in length from north to south and from 14 to 25 miles in width. It is estimated that there are some 300 head of horses running wild on the reserve. It is ten years since the last round-up took place and at that time there was no law under which the horses could be disposed of, when caught if the owners did not claim them. The only thing that could be done at that time was to turn the horses loose again in the foothills, which was done near Cowley.

Will Be Sold at Auction. Under the Miscellaneous Act passed by the Alberta legislature last session, power is given to the minister of agriculture to dispose of the animals for which no owner is found by selling them at public auction. Of the 300 horses now running wild on the reserve it is expected that over half will be found for all except about 75 head. Indians will be employed as riders and the men in charge of the round-up. In future animals found straying on the reserve will be impounded by the Indian police and the owners are now being made for the establishment of a pound.

Improved Cultivation. W. F. Stevens, live stock commissioner for Alberta, who has just returned from the south, where he has been in connection with the forthcoming round-up on the Blood Indian reserve, and round district matters in the Cypress Hills country states that there is a good supply of murex. Ground for the young growing crops which are coming along fine. The land is in excellent condition and is being made into well-farmed land. Other settlements the amount of land on which seed is being sown is small and the general standard of cultivation is much higher than it was two or three years ago. The newer settlements there are all some settlers endeavoring to obtain crops by discing the wheat in the fall.

SETTLE PARLIAMENTARY DIFFERENCES WITH THE DUELLO IN HUNGARY

Budapest, May 15.—Count Stephen Tisza, the Hungarian premier, yesterday challenged to a duel by a fellow countryman, after a lively altercation in a committee room of the Hungarian parliament. Seconds were at once appointed.

Manage Polo Team

London, May 15.—Captain Edwards Darby Miller formerly of the seven-eighths polo team, was today appointed manager of the International Polo tournament to be played during the summer at the exposition in San Francisco in 1915.

Canadians in President. Philadelphia, May 15.—Cincinnati was chosen as the next meeting place, after a spirited contest, and new officers were elected at the final session of annual convention of the American Waterworks association here yesterday. Oscar Muller, of Saratoga, Ohio, was chosen president.

The late government, he said was quite justified in giving aid to link up the system in the prairie provinces with the British Columbia enterprise should not have been undertaken until the system between Quebec Province and the Rockies was in a better position. He claimed that the government had not received any real security for the mortgage given to the C. N. R. E. B. of Toronto moved the adjournment of the debate.

MAJOR GENERAL LEONARD A. WOOD.

CRACKS APPEAR IN FOUNDATION WALLS OF CHURCH

St. Andrew's Parish Claims \$27,500 From City on Account of Damage.

ARCHITECT STATES STRUCTURE IN DANGER

Judge Decides City is Immune in Carrying out Street Improvements.

An important decision was given by Hon. Mr. Justice Stuart in the supreme court today in dismissing the claim of the St. Andrew's parish, church for \$27,500 for damages which it was alleged had been caused by their church building by the city excavating a roadway past the church. Evidence was given on behalf of the plaintiffs tending to show that cracks which have appeared in the foundation walls of the church had been caused by the excavation of the road. By this judgment, Mr. Justice Stuart practically decides that the city is immune from damage claims in respect to existing buildings in carrying out necessary street improvements. The city put up the defense that the road running past the church and known as the Baldwin Hill road has been in use as a highway the past 20 years and was therefore not a new street being opened up. Plaintiffs must have expected that improvements would be made to the road and should have prepared for them.

Address People's Forum.

Addressed by the People's Forum at 8 p.m. on Sunday on "The Preferential Voting System," in the old Presbyterian church, corner of Jasper and Third.

FIRE FIVE REVOLVER SHOTS AT FARMER AND WIFE ON FORT TRAIL

R. S. Webb, a farmer living northwest of the city, was today shot and fired at five times by four masked men last night as he was driving along the Fort trail with Mrs. Webb. Just as they had reached a point just east of the Belmont school the four men jumped in front of the horse and demanded that they stop. Mr. Webb, however, drove on at a faster gait, whereupon five revolver shots were fired after him. None of them hit either of the two occupants of the carriage. The mounted police are securing the neighborhood for clues to the highwaymen, but so far none have been reported.

Hon. F. D. Monk 1343
Montreal, Que., May 15.—Hon. F. D. Monk Esq. M.P. for Jacques Cartier, died this morning.

PEOPLE APPLYING FOR WORK SHOULD GO TO TURNBULL

Booth Wants City Jobs Done in Two Six-Hour Shifts Daily.

GETTING LIST OF CITY'S UNEMPLOYED

Rowan Says Men Working for Board and Room Would Become Worse Off

"Civic Relief Officer T. R. Turnbull has received a number of offers from farmers to give work to the unemployed. Some will pay wages and some offer only board and room. The civic relief officer offered these positions to several of the 'floaters' this morning and not in one single instance did the men avail themselves of the opportunity," stated Commissioner Booth of safety and health this morning at the commissioners' meeting.

"By bringing them here last year and feeding them we made it an open town," said Commissioner Saunders.

"Well, we are giving them work for what they get this time," replied Commissioner Booth.

Upon motion of Commissioner Booth it was decided to insert advertisements in this daily paper requesting that owners of vacant property in the city, who are willing to have the same filled by men, should send them to the civic relief officer and work will be given to these men with a preference to married men and those who are desirous of serving cities. The city will supply seed free and plow the land. Where property has been subdivided the survey stakes will not be molested.

A list will be submitted at the next meeting of the commissioners by the Commissioner Booth showing the number of bona fide residents in the city, the number of men who are out of time in the city, whether married or single and also showing the number of "floaters" who have arrived recently.

Relief Officer Proper Person. Notices in several languages will be posted on the streets of the city block and at several conspicuous places throughout the building, informing people that it is useless to go to the mayor and commissioners' office for work. The proper place to go is to the civic relief officer, as he if the council decide to have a civic employment bureau after next Tuesday the proper place will be there to turn the bureau.

Six-Hour Shifts

Commissioner Booth moved today in order to relieve the distress of the present unemployed the secretary of the commission board at once notified the various superintendents of the city to prepare that it is the wish of the commissioner that, until the demand for labor increases considerably, all men who are employed in the city be employed in two shifts of six hours each; that as far as possible men with families be first to be employed, and those who have been here at least three months, and that a reasonable effort be constantly made to see that the men are doing up on their system, a letter to be sent to each contractor doing work for the city notifying him of the action and that it would please the commissioner to have them do likewise.

It was further decided to show this matter to stand in abeyance until such time as the list showing the number of unemployed is prepared.

Would Make It Worse

When James Rowan, the secretary of the city council, was asked by a Capital reporter what he thought of this and how the men were taking it, he replied that it was a pity that it is a poor scheme. In the first place the idea is in the men's head that they are entitled to a job and it is impossible to lose sight of this fact, and then I don't think that a man would avail himself of this opportunity unless he were absolutely up against it, because what better would a man be off when he came from the farm? He would be dressed in a shabby and have no money in his pocket so that he would really be as bad off after working on no errand for a while as he was before. Besides, the reason would be 'No'.

Lots of Jobs. That there was plenty of small jobs around town seems to be a fact from the numerous complaints that are received almost daily from men who have odd jobs and can't get them to do them because they do not want to pay enough to suit the unemployed. This morning while one of the leading lawyers of the city stated to a Capital reporter that he wanted to fence in a lot that he had in the city but could not get a man to do it.

**THE PROPOSAL WHICH WILL ANNIHILATE
 THE BORDEN GOVERNMENT.**

The pretensions of the Borden government that in its arrangement with Mackenzie and Mann it is making a deal by which the public of Canada is to be protected were shattered in little more than a sentence when Sir Wilfrid Laurier commenced to deal with the proposal in the Dominion house.

Through the newspapers and in the explanation made by Premier Borden in the Dominion house, the country was told that the proposal was to reduce the common stock of the Canadian Northern and its subsidiary companies from \$140,000,000 to \$100,000,000, by wiping out the subsidiary companies and amalgamating all the several parts of the concern, (now stocked in toto for \$140,000,000), into one company, and that the government was to retain \$40,000,000 of the \$100,000,000 common stock. In consideration of this it was to find \$45,000,000 with which Mackenzie and Mann was to complete their railway.

But when the proposal comes into the Dominion house in the form in which it is to be enacted into law, the actual text has an entirely different meaning. The capital common stock of the company is not reduced, but raised. At present the C.N.R. common stock stands at \$77,000,000. This is to be made \$100,000,000, a raise of \$23,000,000. The subsidiary companies are not to be wiped out. On the contrary, the government virtually ratifies the perpetuation of their existence by taking a mortgage upon the holdings of common stock in the various subsidiary companies, twenty-eight in all.

The common stock of the parent company, however, is raised the thirty-three per cent, while the twenty-eight subsidiary companies still remain in existence, the government getting merely the water added to the common stock of the parent company—with a few more sheaves of water certificates thrown across the table from the Mackenzie and Mann stock to make the balance even—and an indirect mortgage upon the common stock of the various subsidiary companies, common stock which does not represent a dollar of invested capital in the first place and which—so the returns show—is already mortgaged for some eighteen millions before the government ever enters into the transaction at all.

Shorn of its pretensions and subterfuges, the whole thing is an attempt, under the guise of protecting the public, to give a value to \$100,000,000 of common stock which represents no investment, and of which Mackenzie and Mann get \$60,000,000. The public—who make the stock valuable by paying the freight—retain four shares for every six they give value to and hand over to Mackenzie and Mann. The stock in the subsidiaries remains where it was and Mackenzie and Mann retain in all, subject to a caveat held by the government. The government's only chance of ever coming into possession of it in case the whole project collapses to such an extent that the twenty-eight various subsidiary companies cannot pay interest on the eighteen millions already raised against the same as collateral. Even in this case, it is not quite clear that the government would not have to pay the eighteen millions to release the collateral before it could come into possession of the actual share certificates; or that it would not be compelled to, whether or no, in case the project collapsed.

As a piece of ponderous bunco the Canadian Northern deal now being advanced by the Borden government is entitled to a place as the climax and crescendo of the rotten politico-financial relationships existing between Canadian governments and Canadian railway manipulators.

Under the circumstances, there is only one way out and this is the way pointed by Sir Wilfrid Laurier. The country cannot afford to see the project collapse. To do so would wreck the credit of Canadian projects all over Europe. It would bring panic and disaster to Canadian institutions, involving thousands in ruin. So completely have these promoters intertwined and involved their schemes with the Canadian banks that it is doubtful if, in case of a collapse of the C. N. R. and a cessation of construction, the Canadian banking system could survive the shock. Not only has public money been poured out through the Dominion treasury to aid the scheme, but the public's savings, through the national banks, have been sided upon the enterprise. It cannot be allowed to stop. It must be put through and it must be placed upon a paying basis.

But where the public is being compelled to finance the project, where the public's money is being poured out through the treasury and through the banks for the construction of the road, the public should and must control the road. This is the stand which Sir Wilfrid Laurier takes; and it is the stand which the public with common sense and a decent regard for the rights of the public.

This was the policy of Premier Borden previous to his coming into office, when he held that where the country was putting up the money to build the road it should control the road.

If the liberal party, previous to the present time, has not laid sufficient emphasis upon this policy, but is doing so now, then the Liberal party has changed its position. It is the policy of the conservative party to put this policy in 1904 and has departed from it upon accession to office, then the conservative party has changed from right to wrong.

Once the Canadian Northern proposal is before the country in a manner that it will be properly understood there is no doubt about what the public will do. The Borden government will be annihilated.

**FOR A MUNICIPAL
 PAVING PLANT.**

The proposal, made by the commissioner of public works, that the city purchase a paving plant and go into the paving business, one which should have been made long ago and given effect to. Had the city had a plant for the past six years it might have been the means of saving the ratepayers a lot of money.

With consistent regularity Edmonton has been paying the highest price paid for paving in the west. And with the same consistent regularity it has been letting the bulk of the contracts to the highest bidder. Whether the city is getting the best quality of work for the money is something which those in the engineering department, who have had the letting of the contracts, claim to be alone competent to judge. But certainly Jasper avenue does not look as though this had been the case. This year, with a new arrangement at the city hall, paving prices show a remarkable drop. But the same recommendation comes through from the same source, in the engineering department, that the highest tenderer get the big business. But to the public, and the public's eye, incidentally, is made without consultation by the engineering department with the commissioner into whose responsibility the adjudication of the matter of contracts properly enters.

The whole thing may be all right, absolutely, and the engineering department which has been giving the contracts to the highest tenderers for years may have good reasons for attempting to do so again in the face of the public's eye. But to the public, and the public's eye, the thing looks mysterious. Certainly there is a very wide range in the prices, a range which is explainable only on one or two grounds, that somebody has been getting too much for work done, or that some others are willing to do work for too little.

The quickest and most incontrovertible way to settle that question would be for the city to go into the business itself. With one year's practical work the actual cost of the plant and the cost of the thing would be paying reality. If the municipal plant never did any more than this, it would pay for itself in one year. If, on the other hand, it should be discovered that the city can do the work cheaper than it can be done under contract, then the city should altogether cease letting contracts.

CORRESPONDENCE.

**EMPLOYMENT AGENTS
 EXPLAIN SITUATION
 AS TO UNEMPLOYED**

To the editor of the Capital—
 Although we, the undersigned, are like the majority of thoughtful citizens who pay scant attention to the idle statements of the I. W. W. leaders and similar unscrupulous agitators, in view of the prominence given in the press of the city and in the deliberations of the city council to certain lying attacks on the employment agencies of this city, it seemed advisable to direct public attention to the true aspect of the unemployment situation.

We are all, say, reputable agents for the employment of labor, with large experience in all the phases of agency work, and the management of construction camps and similar centers of labor. We are licensed by the government by the Dominion government and the city of Edmonton, and our offices are located in the city. We are represented by Mr. A. P. George of the emigration department, and whenever the city desires to fill the positions of the license inspectors. Every fee received is entered in our books and to every man who is employed by us, obtaining work is immediately given an official receipt for his fee. Above all, before the attitude of these agitators, we are notified by the contractor official notification in black and white of all vacancies to be filled.

In addition, any fees or expenses paid by a man who does not receive employment are immediately refunded by us by means of a check. To account for the attitude of these agitators, we might be well to explain at the outset that no employment agent will willingly accept a fee or locate a position to any active member of the so-called Industrial Workers of the World. No contractor will willingly employ them, for he recognizes the folly of advancing railway fares to idle men who try to spread dissension and who are finally fired after two or three days either for incompetence or sheer idleness.

It might also be stated that because of Edmonton being generally known among large employers of labor as the stronghold of the I. W. W. organization, those who employ them have in the past and are now getting their labor from other points as a matter of self-protection. This condition works as a detriment to Edmonton as a center of labor distribution which has been a large factor in the city's prosperity. These accusations against the employment agencies of this city, which contractors and agents are dividing fees wrested from poor men on false pretences and that the three-cent system is being practiced, whereby one gang is working, another gang has been fired, and a third is just being hired.

Now, Sir, these statements are as utterly foolish as they are utterly untrue. What contractor on earth, for the sake of 50 cents, or any other consideration, is going to pay ducks and snakes with his business by hiring men for a day or two, and firing them as soon as they become at all valuable? We hereby challenge any person to bring proof of the absurd statement that the employment agencies of this city, which have been in existence since Canada, and the city of Edmonton, are either dividing fees with any contractor, or maintaining any system by which men are defrauded of one cent piece. The problem of unemployment usually contains elements of the three-cent system. That element is seemingly concentrated in the self-appointed leaders of the unemployed league.

In common with all we regret, for every reason, any tension in the labor market. The remedy, however, would not appear to consist in telling of colored cold-blooded lies about men pursuing a legitimate and honest calling.

(Signed) Busy Bee Employment Agency; Smith and Road Agency; International Employment Agency; Hull Employment Agency; Red Star Employment Agency; Western Employment Agency; Canadian Northern Employment Agency.
 Edmonton, May 14.

**CORRECTION IS MADE
 OF IMPRESSION AS TO
 FISHERY REGULATIONS.**

To the Editor of the Capital:
 An article published in your issue some several weeks ago with regard to a change of the administration of fishery laws by a more rigorous enforcement of fishery regulations respecting anglers has had a quite misleading effect in the country districts. Though your statement was substantially correct many settlers have misinterpreted it, evidently thinking that an unreasonable restriction had been placed on the privilege, so long enjoyed by them, of angling for jackfish, and other varieties of coarse fish.

I will be very obliged if, through your columns, in the public interest, you will correct this impression. So far as I am informed no change has been made in the fishery regulations. The regulations under order in council of 12th February, 1910, though the department of fisheries is endeavoring to enforce these regulations more strictly than formerly.

The following extracts from the fishery regulations will be of interest to anglers, and will I am sure, be approved of by all true sportsmen.
 "Section 21.—(a) Any angler or trolling in waters frequented by trout, grayling or Rocky Mountain Whitefish, is prohibited, except under permit. (b) Every British subject resident in the province for which it is issued shall be eligible for an angling and trolling permit. The annual fee for such permit shall be one dollar. (c) Every non-resident shall be eligible for an angling and trolling permit on which shall be one dollar for a single day, or \$5 for the season.
 (d) In waters not frequented by trout, grayling, or Rocky Mountain

Laughs With Joy!

No More Indigestion

Montreal Man So Ill, Thought He Would Die of Stomach Trouble.

Found a Simple Remedy That Has Kept Him Well Ever Since

The experience of Mr. Larose is one very common today. I suffered from indigestion for five years. I suffered so much that I could hardly attend to my work. I was weak and lost all courage. I enjoyed no rest until I decided to follow your treatment. To my great surprise I immediately began to feel better. I am now using the second box of Dr. Hamilton's Pills, and I feel so well that I want to tell you that I owe this great change to your famous pills. I recommend Dr. Hamilton's Pills to every person who is suffering from dyspepsia. Your grateful servant, D. R. Larose, 325 Joliette street, Montreal, P.Q.

All who have weak stomachs, and those who suffer with indigestion, headaches, biliousness, can be perfectly cured by Dr. Hamilton's Pills. See per box, at druggists and storekeepers, or the Catherston Co., Kingston, Ont., and Buffalo, N.Y.

Whitefish, angling or trolling may be carried on by resident British subjects without permit.

The law requiring anglers who may fish in streams frequented by trout, grayling or Rocky Mountain Whitefish to pay a fee, and take a permit, is intended more particularly to apply to the muskrat streams, such as the upper waters of the Saskatchewan, Macleod, Pembina, and Athabasca, and the nation which has been strictly enforced would apply to angling in the Saskatchewan river in the neighborhood of Edmonton, where trout are sometimes found.
 J. D. WILLSON,
 Inspector of Fisheries.
 Edmonton, May 15.

FIRST THINGS

The first foreign-war in which the United States engaged was against her former friend and ally, France. The tone of judicial opinion has been France and the United States were not at war, but, as several naval engagements were fought, there were all the conditions of real warfare except a formal declaration. The seizure of American vessels by France was the cause of the trouble, and on May 15, 1797, just 117 years ago today, a special session of congress was convened in Philadelphia at the call of President John Adams to consider the strained relations between the United States and the nation which had advised us to remain neutral. It was the mission of the United States to achieve its independence. France was then governed by the directory, and Napoleon had just commenced those successful campaigns which were to win for him the imperial crown. A commission was sent to France to take up the matter of a settlement. When the commissioners were asked to leave members of the directory, Charles C. Pinckney replied with the famous phrase, "Millions for defense, but not a cent for tribute." The commission failed in its mission, and in 1798 commercial intercourse with France was suspended. All French treaties were declared void, and naval warfare commenced.

TODAY IN DOMINION HISTORY.

Every North American knows the story of Wolfe's great victory on the plains of Abraham, a triumph which cost the life of the gallant young commander, but what came after is less a stirring tale which is seldom told. The British conquest of Canada was far from assured by the capture of Quebec. The French still had a large army in the field, and an able commander in De La Riviere. The latter defeated Murray, who had been sent Wolfe, upon the battlefield of St. Foye, and the English were driven into the city. Cold, hunger and declining illness worked havoc with the British defenders of Quebec, and the winter following Wolfe's victory was one of terrible suffering and hardship. The lilies of France had been hauled down from the ramparts of Quebec, but there was still hope for the French. Victory for one side or the other depended upon the arrival of reinforcements. With the coming of spring De La Riviere hoped for the arrival of the expected French fleet, while the English troops shut up in Quebec were equally anxious for success. It was a critical situation, with the final trial still in the balance, when on August 24, 1760, today, May 15, 1760, the British fleet under Admiral Swanton arrived for the relief of Quebec. The British made it certain, the British made the conquest of Canada possible, I. A. It was Admiral Swanton's fleet that made it certain. The British troops advanced on Montreal but it was not until September, 1760, a year after the battle on the plains of Abraham, that the astute De La Riviere was finally hemmed in by an overpowering army and forced to surrender. It was then left to diplomacy to complete the conflict of centuries, and for once, when Canada was concerned, the British diplomats were successful.

from Pleistocene (possibly Pliocene) gravels in Java had a capacity of only 900 units. If we suppose that some specimens of the gorilla may have a brain a third larger than the average we get 500 for the biggest gorilla brain, and we are less than 900 as the normal human race of Java gravel varied to the same extent—viz., by a third more or less around 900 as the normal played a role in conclusion. Wolfe's victory made the conquest of Canada possible, I. A. It was Admiral Swanton's fleet that made it certain. The British troops advanced on Montreal but it was not until September, 1760, a year after the battle on the plains of Abraham, that the astute De La Riviere was finally hemmed in by an overpowering army and forced to surrender. It was then left to diplomacy to complete the conflict of centuries, and for once, when Canada was concerned, the British diplomats were successful.

TODAY'S BIRTHDAY PARTY

Sir Ray Lankester, 67 Today, Famous Son of Famous Father.

Sir Edwin Ray Lankester, the distinguished English zoologist and evolutionist, was born today, May 15, 1846, seven years ago today. Like that greatest of evolutionists, Charles Darwin, he was a naturalist from his father, and his youth was spent in an atmosphere of scholarship and scientific interests. The elder Lankester was a celebrated physician, lecturer at medical colleges, editor of the Journal of Social Science, and the author of several mental and sociological works. The centenary of the birth of Dr. Edwin Lankester was observed by English physicians last year.

Darwin's theories as to the origin of species were beginning to win the general acceptance of the scientific world, but were bitterly opposed by theologians, when Edwin Ray Lankester was a student at Downing College, Cambridge, and Christ Church, Oxford, and the young man early became a devoted devotee of Darwinism. The patient research which had marked Darwin's development of his special theory was reflected in the first book of his disciple, "A Monograph of the Cephalopoda Fishes," which was published when the author was only twenty-three years old.

Sir Ray spent many years in a thorough study of the brains of man and his "apellid" predecessors, and he has found that there is no so-called "missing link" between man and monkey so far as size of brain is concerned. "Using cubic centimeters as units," said the scientist, "we find that a good average European brain is of the bulk of 1,500 units. The gorilla has a slightly larger brain than the chimpanzee, but a third more, and a third less, that is, from about 1,000 units to nearly 2,000. The skull of the fossil man

also varies within very large limits, about a third more and a third less, that is, from about 1,000 units to nearly 2,000. The skull of the fossil man

**QUICK HELP FOR STRAINS AND SPRAINS
 WONDERFUL RELIEF IN ONE HOUR**

Rare Herb and Root Extracts in This Limiting Give it Marvelous Power.

RUB ON NERVINE

You'll be astonished at the rapid pain relieving action of "Nervine." Its effectiveness is due to its remarkable penetrating power—it strikes deeply, sinks to the very core of the trouble. Nervine is stronger, many times stronger, than ordinary liniments, and we clearly assume that the more it will relieve a sprain, how it takes out

lameness, how it soothes and eases a bruise.

Thousands say no liniment is half so useful in the home. This must be so, because Nervine is a safe remedy—you can rub it on even a child with fine results.

Just you keep Nervine on hand—it's a panacea for the aches, pains and slight lumps of the whole family. One bottle will keep the doctor's bill small, and can be depended on to cure rheumatism, neuralgia, lumbago, sciatica, toothache, pleurisy, strains or swellings. Wherever there is a pain rub on Nervine; it will always cure.

The large 50c family size bottle is the most economical; trial size 25c. Sold everywhere by dealers, or direct from the Catherston Co., Kingston, Canada.

compared with man's brain. The two sets of convolutions agree very closely, but are less extensive in the apes. . . . The convolutions of the brain of lower races of men have not been fully described and illustrated, showing less complexity than is usual in European man and making a distinct approximation to the apes, but still possessing in fair proportion the convolutions characteristic of the human brain.

We Noticed That

Rosemary—Have you ever been impressed by the mystery of Mona Lisa's smile?

Thornton—No. She looks to me just like some woman who is doing her best to laugh at one of her husband's jokes.

Claremont, N. H., has just spent \$75,000 for a new water reservoir, capacity 27,000,000 gallons.

Conducted by Mrs. Taylor.

THE GAY WORLD.

Mr. and Mrs. R. G. Davidson have as guest their sister, Mrs. J. P. Cairnes, of Saskatoon.

Mr. and Mrs. G. W. Magoon of Orleans, Vermont arrived this morning and are the guests of Mr. and Mrs. H. A. Magoon, eighth street.

Mrs. Percy Page was hostess yesterday afternoon at a little informal bridge and in compliment to Mrs. F. W. Fortin, of Winnipeg, when two tables competed for the honor score.

Mrs. Fortin of Winnipeg is the guest of her parents Mr. and Mrs. J. W. Webster, Victoria avenue.

Mr. L. W. Bell of Medicine Hat arrived in the city Monday and takes a position with the firm of Hyndman & Hyndman for the summer.

Mrs. J. Percy Page is leaving early in June to spend six weeks with her parents at St. Stanley, Ontario.

The Daughters of Zion who entertained at their first ball since organizing in Edmonton at the Crescent last evening, had a good attendance, about 75 couples being present. It being an informal Cinderella, at twelve the assembly dispersed. Mrs. Berkman, president, Mrs. Laiden, Mrs. Diamond, Mrs. Boyaner and Mrs. Abramson, composed the committee who had the arrangement in charge.

A few of those present included Mr. and Mrs. Diamond, Mr. and Mrs. Boyaner, Mr. and Mrs. A. Braum, Mr. and Mrs. Laiden, Mr. and Mrs. Berkman, Mr. and Mrs. Abramson, Mr. and Mrs. Ross, Mr. and Mrs. Laiden, Mr. and Mrs. Brody, Mr. and Mrs. Monty Greenblatt, Mr. and Mrs. Goldsmith, Mr. and Mrs. Supers, Mrs. Allen (Gargy), Mrs. Soskin (Regina), and others.

Aunt Sally's Advice To Beauty Seekers

Sally says: "I've tried most everything for my freckles, but can't seem to get them out. What do you suggest?" See answer to "Sally" in the next issue. I've never known to fail in any case of freckles or other cutaneous blemishes.

P. J. K. asks: "Is there anything better than massage to cure wrinkles, Mr. and Mrs. Laiden, Mr. and Mrs. Berkman, Mr. and Mrs. Abramson, Mr. and Mrs. Ross, Mr. and Mrs. Laiden, Mr. and Mrs. Brody, Mr. and Mrs. Monty Greenblatt, Mr. and Mrs. Goldsmith, Mr. and Mrs. Supers, Mrs. Allen (Gargy), Mrs. Soskin (Regina), and others."

Sally writes: "My complexion is horridly muddy. What shall I do for it?" See answer to "Sally" in the next issue. Apply this night-cream to your face, and you will find it a great help. It will cause the freckles to gradually fade away, by a process of gentle absorption, for the face, very healthy, and skin underneath. Woman's Balm.

Silverman, the Misses Cristall, Miss Kline, Miss Gluck, the Misses Rao and E. Wood, Miss L. Lavy, Messrs Roth, I and J. Kline, Mr. Tipp, Samuels, M. Michaelson, Carmichael, Nicholl, and others.

Mrs. Amos Campbell and Mrs. James Brodie entertained the ladies' 500 club yesterday afternoon.

The Women's Canadian club are entertaining at luncheon today in the Empire auditorium, Mr. Benson and Mrs. Green, of the Stratford-on-Avon players.

Mr. and Mrs. James Turner entertained at a delightful progressive 500 and dance last evening, when about fifty of their friends were recipients of their hospitality, it being the twelfth anniversary of their marriage. This announcement was made to the guests during the evening, which came as a surprise from their hostess.

In the large colonial hall an orchestra, as discussed, a delightful music throughout the evening.

Mrs. Turner was wearing a smart evening toilette of apple green charmeuse with draperies of chiffon. The fortunate winner of the lady's first prize, a beautiful hand-painted dish, was Mrs. Stringer, while to Mr. Stewart was awarded the gentleman's prize, a handsomely bound volume.

After a tasty buffet luncheon, dancing was indulged in for an hour or so.

The guests included Dr. and Mrs. Brander, Mr. and Mrs. A. T. Mode, Mr. and Mrs. Reginald Smith, Mr. and Mrs. Charles Morrison, Mr. and Mrs. Duncan, Mr. and Mrs. H. H. Crawford, Mr. and Mrs. Ross, Mr. and Mrs. G. Silverman, Mr. and Mrs. Wm. Landy, Mr. and Mrs. Stringer, Mr. and Mrs. James Green, Mr. and Mrs. Muckewich, Mrs. Green, Mr. and Mrs. (Pfeiffer), Mr. and Mrs. Weeks, Mr. and Mrs. Harry Taylor, Mr. and Mrs. Thomson, Mr. and Mrs. Jacques, Miss Appleford, Mrs. Fraser, Mr. Stewart, Mr. Fraser, Mr. Mark Turner, Mr. Dunthorn, and others. One of the guests who greatly enjoyed the evening was the young daughter of the house, little Miss Margaret Turner.

Last City Beautiful Lecture Last Night

The last of the series of City Beautiful lectures was given last night in Separate School by Mr. A. W. Foley, I.R.A., when Mayor Macdonald presided and expressed his appreciation of the many helpful and practical suggestions made. Mr. Foley touched upon the high cost of living, and in this connection stated that in spite of legislation, consumers' leagues, and what not, so long as the supply remains much less than the demand, the high cost of living would not be materially lessened. He suggested that men of the city would do well to take off their coats and go into their back yards and plant gardens, thus supplying vegetables and delicacies for their own tables, and this, he stated was one of the most practical ways of bettering the cost of living. He went on to state that many of the farmers even do not grow the vegetables they need for their own family, and that therefore this deplorable condition was not inherent throughout the province of Alberta.

In connection with the lecture numerous slides were shown of the grounds and buildings of the National Cash Register company of Dayton, Ohio, both before and after the work of beautification took place. The boys' gardens, meaning the children of the employees of the company, was one of the slides shown, which was a practical illustration of what boys and girls can do in the way of gardening.

USUAL ADMISSION.

WOMEN'S AUXILIARY INDUSTRIAL ASSN.

The women's auxiliary to the Edmonton Industrial association held a meeting yesterday afternoon in the Empire auditorium immediately after the luncheon, when about 20 members were present.

Mr. Jackson, supervisor of playgrounds, was present and gave a short address on the necessity of having breathing spaces in the city, and advised that wherever possible an open space should be left in every block or every two blocks of the city. As the city grows these breathing or open spaces become more necessary for health, and can be acquired at a much less cost than in years to come when the absolute necessity for having same will become more apparent than now. In support of this Mr. Jackson cited the cases of London where in the cockney districts of London where there is not a park or a breathing space, and where the residents are ill, undernourished and tubercular. To avoid such conditions in the future, the speaker pointed out that now is the time to prepare.

Mr. Jackson also spoke of the city playgrounds, four of which he hoped will be ready for the children by the first of July, and explained how the children under the supervision of competent persons will be taught to play. He also stated that at present hundreds of children do not really know how to play, and if the children were properly instructed in playing the same, would become a source of pleasure, amusement, and health to courts, swings and all games for children will be arranged for in these playgrounds, and for the smaller children kindergarten games will be arranged, so that mothers who let their children go to the playgrounds will be perfectly secure that while there the youngsters will be looked after and given nothing detrimental besides being instructed in healthful games and exercises. He explained further how the children would be kept from doing anything. They would simply be helped in whatever play they wished to play, and if they had a wish to use a swing for instance, its rights would be protected, as well as the children's health, and in return at whatever game it chose to indulge in.

To those assisting in the program, Mrs. Aldridge, Madame Cochrane, Mrs. Rose Greve, the Misses Patterson, Fitchner, and Webster, and the accompanist, Miss Bell, both the audience and the association are deeply indebted for a delightful musical treat.

WOMEN'S AUXILIARY INDUSTRIAL ASSN.

The women's auxiliary to the Edmonton Industrial association held a meeting yesterday afternoon in the Empire auditorium immediately after the luncheon, when about 20 members were present.

Mr. Jackson, supervisor of playgrounds, was present and gave a short address on the necessity of having breathing spaces in the city, and advised that wherever possible an open space should be left in every block or every two blocks of the city. As the city grows these breathing or open spaces become more necessary for health, and can be acquired at a much less cost than in years to come when the absolute necessity for having same will become more apparent than now. In support of this Mr. Jackson cited the cases of London where in the cockney districts of London where there is not a park or a breathing space, and where the residents are ill, undernourished and tubercular. To avoid such conditions in the future, the speaker pointed out that now is the time to prepare.

Mr. Jackson also spoke of the city playgrounds, four of which he hoped will be ready for the children by the first of July, and explained how the children under the supervision of competent persons will be taught to play. He also stated that at present hundreds of children do not really know how to play, and if the children were properly instructed in playing the same, would become a source of pleasure, amusement, and health to courts, swings and all games for children will be arranged for in these playgrounds, and for the smaller children kindergarten games will be arranged, so that mothers who let their children go to the playgrounds will be perfectly secure that while there the youngsters will be looked after and given nothing detrimental besides being instructed in healthful games and exercises. He explained further how the children would be kept from doing anything. They would simply be helped in whatever play they wished to play, and if they had a wish to use a swing for instance, its rights would be protected, as well as the children's health, and in return at whatever game it chose to indulge in.

At the close of Mr. Jackson's remarks Mrs. Strong read the minutes of the last meeting which with one correction was approved. A resolution was passed that a letter be written to the 1st beautification committee of the industrial association concerning this matter. Mrs. John P. Macdonald was appointed a delegate to confer with the committee, and also to appoint two other members to assist her if necessary.

A motion was also carried that a communication be sent to the proper authorities who have the matter in charge recommending that more waste paper receptacles be placed along the streets, and that the same be painted green to distinguish them from the letter and package boxes along the street, as it is ever and oft times these boxes are used for mailing letters and packages, instead of for waste paper.

The president also discussed upon a charge of name for the Women's auxiliary, as she was of the opinion that women's auxiliary meant a church organization in the east, and that perhaps many people even in Edmonton knew the meaning of "Women's Auxiliary" and would connect it with a church organization instead of an auxiliary to the "Ad Club." After the suggestions of several names for the organization, no motion or vote being taken, she instructed the press members present to be sure and get the name right, and that "Ladies auxiliary" would be the future name of the organization. But as no action was taken by the members of the association, the name remains as at first voted by the members at their first meeting.

Reports from the different committees were then in order, each of which was accepted.

Mrs. John P. Macdonald made a motion which was seconded by Mrs. Macdonald and Mrs. Laiden, and others that the thanks of the association be extended through the press to all the lecturers, the musicians, the teachers, and principals of schools and in fact, one and all who have so kindly assisted during the past two weeks in helping along the work of the association. After a vigorous protest by the president against thanking persons for doing their duty, this motion was carried.

Mrs. Frank Morgan who had the matter of the old hotel and grounds along Saskatchewan avenue in charge stated she had no report to make as yet.

A motion was made and carried that the secretary write personal letters of thanks to the school, board of the public and separate schools, Superintendent Carpenter, the lecturers, donors of seeds, Messrs. Potter, Murray, Brydie, Magrath, Almsworth and Brydie, thanking them for their interest and assistance.

The matter of fees which was voted upon and settled at the first meeting of the association six weeks ago, several ladies having already paid their fee of \$1, was again gone into, the

president stating she did not believe in fees for such an association, and that the women should go to the men for whatever favor they needed in their work. Many of the members objected to being dependent upon the generosity of the men for their funds to work out their own campaigns, and voted that the fees be paid.

The president then requested that a nominating committee be appointed to prepare nominations for the permanent organization which will take place in two weeks, as that was the up-to-date method of choosing officers. No one made any motion and it was decided that the members choose their own officers direct at the next meeting.

Without further formality the president declared the meeting adjourned.

WOMEN'S PLANS FOR CELEBRATION OF PEACE CENTENARY

Rome, May 16.—The quinquennial session of the International congress of women closed yesterday, after it was decided that the executive should meet in England in 1916, at Budapest in 1918 and in what city was to be a conference should be held in Norway in 1920.

One hundred and fifty English speaking women, presided over by the Countess of Aberdeen, discussed the participation in the centenary of Anglo-American peace. It was decided that the Canadian and American women should join in the publication of a history of the effects of Anglo-American treaties and that four at Buffalo, Boston, Detroit and Seattle, respectively. In addition to a special meeting at Vancouver, Canadian women will speak at all of these meetings and American women will take part in meeting in Ottawa.

Conan Doyle to Visit Canada
London, May 15.—Sir Arthur Conan Doyle, the famous forensic lawyer, will visit Canada next week. He travels from Montreal via the Grand Trunk Pacific to Jasper park in the heart of the Rockies, and then on to Banff where he intends camping out with Col. Maynard Rogers whom he first met during the Boer war.

Economist to Lecture.
David Goldstein, secretary of the Berton school of political economy, will lecture on "Christianity versus Socialism" at the Empire auditorium Monday evening next, at 8.30 o'clock. The lecture will be given in the Berton school of political economy. Admission is free and no collection will be taken. A cordial invitation is extended to everybody.

Lady Golf Champion.
Hunstanton, Eng., May 15.—Miss Cecile Leitch won the British women's golf championship today, defeating Miss Gladys Ravenscroft, women champion of the United States, by two holes up, and one to play.

GOOD ATTENDANCE ALREADY ASSURED FOR SPRING MEET

With the splendid weather Edmonton has been favored with one natural long for an afternoon spent in the open, and already the citizens are planning to be free to spend the days of the spring race meet, May 23, 25 and 26, on the exhibition grounds.

Present indications go to show that the grand stand will be thronged with enthusiastic crowds of spectators, and the following boxes have already been taken for the entire race meet.

The lieutenant governor, the mayor, E. L. Ferris, J. P. Hogan, Mrs. Broadford, E. M. Lee, Robt. Mays, G. C. Valens, J. H. Morris, A. B. Campbell, W. J. Stark.

Edmonton Canoe Club Dances.
The informal dance at the Edmonton Canoe club house last evening, turned out to be one of the most successful and enjoyable dances of the season.

The goodly number present filled the floor to perfection and the music was of the very finest, having that acceptable quality that welds the whole into a unit of perfect rhythm.

Practically all of those present were of the younger set who will be particularly interested in and participants of the different sports throughout the season, as a matter of fact the conversation throughout the evening was very much a matter of a forecast of the pleasure that will be had "on the river," and "when is the next dance?" was repeatedly heard.

The dresses worn by the ladies were delightfully informal and particularly pleasing on this occasion to the radiant young faces. The men were practically all known to one another, and made it their special effort to be comfortable and be affable. In all the event proved itself to be one of those rare functions that go to cementing a club together and forwarding a future such as the best boating clubs of the east are noted for.

Unpublished Keats
London, May 15.—Two more unpublished poems by Keats have been discovered. They are sonnets, which must have been written late in 1817. They will be published in the London Times next Monday, with a facsimile of the only copy extant, which is from Keats' own hand.

STRATFORD PLAYERS OFFER SHAKESPEARE AT EMPIRE THEATER

A representative audience of Edmonton theatre-goers, probably for the most part students to a greater or lesser degree of Shakespeare, was carried back to those golden days of England when the old Globe theater was running and Queen Elizabeth was one of its patrons, by the presentation last night in the Empire theater of "The Merry Wives of Windsor," by the noted Stratford-on-Avon players.

This was one of a series of four of Shakespeare's immortal dramas which the company presents here. Tonight "The Taming of the Shrew" is the attraction. "The Merchant of Venice" follows tomorrow afternoon and "Hamlet" on Saturday evening. If one could judge from the appreciation shown by last night's audience, Edmontonians will all the Empire theater to capacity for the remainder of the series, as it is an excellent indeed an artistic and artistic, but also to study Shakespeare, the greatest dramatist of all time, in the most realistic and interesting way.

The Stratford-on-Avon company is composed of nearly 50 people, undoubtedly one of the largest and most talented bodies of exponents of the drama ever toured North America.

At home western Canada, this company has played the same parts which it is now presenting in Edmonton before the world's foremost students of history and Shakespeare.

Stratford-on-Avon, the birthplace of Shakespeare, in addition, is a probable that Shakespeare depicted the life of his birth more truly and more thoroughly than in any other play. This is the conclusion which has been reached by many of his students, which made the presentation last night doubly more interesting.

One of the interesting features of the performance of "The Merry Wives of Windsor," was the absolute correctness of the costumes and scenery from a historic standpoint. To judge once at the ragged clothes hanging by the side of one and then at the magnificent gowns and hats and accessories made it seem as if one were really living in the sixteenth century instead of the twentieth century and taking part in the wonderful history evolved in the brains of the truly great author of the play.

The fact that the dress and scenery had not changed to conform most to modern fashions added greatly to the value of the performance educationally.

However, perhaps after all, the most remarkable part of the production, however as it was portrayed by the Stratford-on-Avon players, and correctly as it was staged with the aid of modern appliances, is the realization after 300 or more years that a human being could write such dramas.

The depth of his conception is beyond belief, even in these days of wireless telegraphy, while his intimate knowledge of human nature has always, of course, been a source of astonishment to students of the drama, history, economics and other sciences.

There is lots of humor and comedy in "The Merry Wives of Windsor," yet it fairly bristles with lessons and incidents true to history, even of today.

For instance, as Sir Hugh Evans, a Welsh parson, holds a heavy cane in his hand when he hears of the approach of Dr. Calus, he asks:

"Then, holding his heavy cane, which would do very well for a weapon, pointed toward the side, he says that right may prevail."

Which would tend to prove that Shakespeare, as long as three and a half centuries ago, recognized that right was right, something that a great many of this generation have either not thought about or have not proved to their satisfaction.

J. R. Benson, under whose leadership the company is playing, does not take the part in "The Merry Wives of Windsor," which would give him the greatest scope to display his ability to interpret and present Shakespeare, this going to William Calvert as Sir John Falstaff. It is stated, however, that the company is not one of headliners, unless indeed every one can be called such, and Mr. Calvert certainly took advantage of his opportunities and was given the support of the importance of the piece demanded.

Mr. Benson took the part of young Dr. Calus, a French doctor, and he, like the others, seemingly had but one mind in mind, and that was to portray Shakespeare. Dorothy Green and Marion Foreman, as "the merry wives," should also be given special mention for the manner in which they handled their somewhat difficult parts. Murray Hamilton, as Ford, husband of one of the merry wives, had also a role which must be rather difficult, but which does not in the least seem so as he plays it.

VERSATILE BILL FOR PANTAGES PATRONS, ANIMAL ACT LEADS

The Pantages theater announces an extraordinary bill for next week, headed by Little Hipp, the famous elephant and Napoleon, his monkey trainer, and when the old Globe theater was running and Queen Elizabeth was one of its patrons, by the presentation last night in the Empire theater of "The Merry Wives of Windsor," by the noted Stratford-on-Avon players.

This was one of a series of four of Shakespeare's immortal dramas which the company presents here. Tonight "The Taming of the Shrew" is the attraction. "The Merchant of Venice" follows tomorrow afternoon and "Hamlet" on Saturday evening.

If one could judge from the appreciation shown by last night's audience, Edmontonians will all the Empire theater to capacity for the remainder of the series, as it is an excellent indeed an artistic and artistic, but also to study Shakespeare, the greatest dramatist of all time, in the most realistic and interesting way.

"TIZ" GLADDENS SORE, TIRED FEET

No puffed-up, burning, tender, sweaty feet—no corns or callouses.

"TIZ" makes sore, burning, tired feet fairly dance with delight. Away go the aches and pains, the corns, callouses, blisters, and chafes.

"TIZ" draws out the acids and poisons that puff up your feet. No matter how hard you work, how long you dance, how far you walk, or how long you remain on your feet, "TIZ" brings restful coolness.

Get a 25 cent box of "TIZ" now from any drugist or department store. End foot torture forever—wear smaller shoes, keep your feet fresh, sweet and happy. Just think! A whole year's foot comfort for only 25 cents.

PROGRAM OF COMEDY TODAY AND TOMORROW DREAMLAND THEATER

Plenty of good comedy is being shown today and tomorrow at the Dreamland theater in "The Drama in Heyville," an Edison two-reel comedy. Ashley Miller, who wrote and produced it certainly did himself proud, for it is witty, original, and runs the gamut from the sublime to the ridiculous.

Hod Mullins, actor and manager of the Denosethens Dramatic club of Heyville, writes and reproduces the "Union Spy," a drama he has attended in the city, with the assistance of the members of his club.

In the first part is shown the city production by a strong professional cast, and takes cognate from a lower box. The second part is shown, casted, rehearsing and producing the "Union Spy" in the town hall. He has contending with the usual kickers, etc., but wins out. The scenery, costumes and properties are almost as good as the show.

The cast is made up of the best Edison people. It is difficult to visualize any spectator who fails to laugh at and enjoy this picture. The latest "American Pathé Weekly" is also on this program with some more comedy.

INTERESTING AND EDUCATIONAL, THIS EMPRESS FEATURE

An interesting educational moving picture, and one of sociological interest, yet not having lost the element of entertaining quality is the two reel feature "The Surgeons Experiment" that is showing at the beautiful Empress Photoplay theater for today and tomorrow.

Dr. Gale theorizes that crime tendency is the result of lack of capacity in a certain part of the skull for sufficient brain expansion. He asks Senator Brady to introduce the bill empowering surgeons to operate on criminals.

The surgeons scoff at the idea, but promise if he can show one criminal relieved of his evil tendencies he will introduce the bill. The doctors, one wish is to capture a burglar, and is gratified, for Dick Clayton, alias "Red Dick," invades his house that night.

With the aid of drugged wine the doctor captures him and before recovering consciousness to resist, the operation is performed. Later, the doctor tells "Red Dick" he has removed all desire for crime and has so much faith in the cure that he persuades the senator to employ Dick in his office.

He knows there is but one fence who would handle the bonds so he brings into the fence's store and soon has the senator, finding the bonds had not been delivered, tells the doctor that he experiment failed and will have to make good the loss. The doctor asks the senator to suspend judgment until morning, but late that night, as Dick does not show up, he concludes the senator was right and is disappointed.

Next morning Clayton turns up with the bonds and explains the delay was caused by an attack of vertigo. He says he has been cured and will now introduce the bill.

The acting is very good and all in all the film is of a very excellent kind. Ed Coxon one of the stars of the old pictures exhibited on this same program.

John Bunney one of the highest salaried picture players in the world, and as "Fanny" is in fact pictured in the comedy.

The very excellent Empress Concert Orchestra will render some new pieces. The grade of music furnished by these talented players adds wonderfully to the evening's enjoyment.

CROP PROSPECTS BEST IN YEARS SAYS T. C. DARRELL

That the crops throughout Manitoba, Alberta and Saskatchewan are in the best condition and farther advanced than in former years, and that the prairie provinces are in for one of the best seasons in the history of the west, was the stated opinion of T. C. Darrell, a member of the Grain Growers' Exchange of Saskatchewan, at the King Edward this morning.

"The farmers are preparing for the greatest season in the history of the west," said Mr. Darrell, and stated that a call to the unemployed of the western cities would soon be given to help with the work on the farms. He also stated that the Grain Growers' Exchange of Saskatchewan had sent word to the railroads to the effect that farm laborers would be needed from the east this season, that there were plenty in the three prairie provinces to look after all of the work.

Mr. Darrell stated that the shortage of blunder twine, due to the Mexican war is the cause of considerable alarm among the farmers.

GOOD STUNTS TONIGHT IN AMATEUR ACTS AT THE BIJOU THEATER

Amateur night tonight, a selection of the best of motion pictures, and one of the neatest dancing acts seen in the city for some time, is the bill at the Bijou theater for today and tomorrow.

Boss and Leduc, the dancers, give a number of the present day dance crazes and show them off exceedingly well. The outstanding feature of the act is its high class character. For today and tomorrow they will change their dances and will show the "Texas Tommy" amongst others, and a few new steps in the tango. This feature costs the Bijou management quite an additional amount, but apparently they are determined to win over to themselves the lion's share of the business, and that they are succeeding is not far from the mark, with such attractions as these for the small price of admission.

A number of very good stunts has been arranged for tonight in the amateur acts. There is a good quantity of satisfactory talent and Mr. Hazza has selected the best of them only.

The two reel feature, "Out of the Depths," tells a wholesome story. Albert Rogers, president of the National Amateur Athletic Union, who John Harvey is employed as paying teller, has a winsome young daughter, Vera, who is loved by John and who resists the young bank clerk's affection.

The father is disposed to look with favor upon this state of affairs, until Mr. Rogers takes John to task, next day for his apparent wildness, and as John seems persistent and promises he will never repeat the offense, the old banker restores him to favor, though naturally there is a lingering doubt in his mind and a slight mistrust of the boy.

Tom Carr, the faithful old watchman who makes his home with his half-witted daughter, Clara, idolizes his little grandchild, Alice, of whom John is also very fond. At a meeting of John's friends, it is decided that a younger man would be better suited for the position of watchman, and Tom is accordingly dismissed. John is sent with \$1,000 in cash to pay a note, and while on this errand comes across old Carr, who tells him that Alice is ill and that since his discharge poverty has gotten them in his grasp. John determines to call on the little girl and offer what he might be able to.

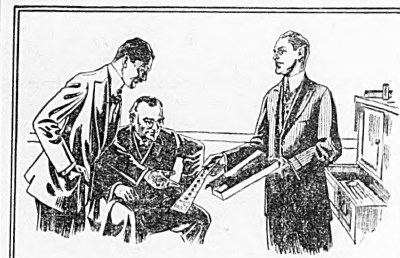

Arriving at her destination, after the visit to Alice, John is horror-stricken to discover that his \$1,000 has disappeared. He knows that he will be suspected of theft, and decides to offer any explanation, he determines to go away. He enlists in the navy and then follows a sequence of events, exciting, interesting and novel, which result in the unveiling of the mystery, the vindication of John and a happy reunion of the sweethearts.

In this picture is again emphasized the wonderfully great advantage of the motion picture for beautiful setting. Galveston, Texas, meters all water.

MONARCH WILL SHOW FAMOUS PLAY "PAID IN FULL" IN MOVIES

Today the Monarch is offering a sensational feature called "The Burning Train," presented by the Itala company, together with Ford Sterling's first release comedy called "His Wedding Day."

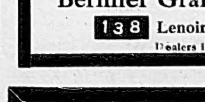

The picture theater goes with the name of Mr. Sterling as having been a sensational feature and is now with the Universal Film and putting out comedies under the name of the Itala company which is famous for this style.

For Wednesday and Thursday next week, the All-Star Feature Film company will present with the original Broadway cast and Tully Marshall.

Keen and sympathetic appreciation of dramatic construction and values and exceptional acting mark the five part motion picture production of Eugene Walter's famous play, "Paid in Full," produced by the All-Star Feature corporation. Schom, if ever, has

Victrola IV \$20

Other styles of the Victor or Victrola, \$20 to \$300

a picture, even though of shorter length, been produced with the story as logically developed, with such fine dramatic worth of the vehicle so well brought out.

The full power of the film is hinted at when it is realized that four players carry the whole five reels. The picture is entirely drama. It is all acting. There is no element of the spectacular in it, except in a few scenes of mutiny the domineering and harsh character of Captain Williams.

As an artistic picture, "Paid in Full" is well worth serious study. Original and beautiful lighting effect predominates throughout the film. This was obtained by having most of the light thrown from behind the camera. This throws the faces and figures of the players into bold relief and also gives an effect of depth to the scenes.

"Paid in Full" will be seen at the Monarch next week, Wednesday and Thursday.

WHAT GRADING CREAM DID FOR ALBERTA FIRM.

Keen Competition of New Zealand Butter Forced Creamery Men to Seek Remedy

PAID OFF DEFICIT
AND NOW HAS SURPLUS

Alberta Department of Agriculture Showed Way Out of Difficulties.

The keen competition which Alberta creamery butter met from New Zealand butter on the markets of the Pacific coast during 1912 resulted in certain of the Alberta creameries having to record a deficit for that year on account of having produced considerable second class butter. This had the effect of stirring up new ideas for improved work in 1913. The example set by the manager of the Cardston creamery shows what can be done in the way of securing results when the proper method is employed.

At the close of the year 1912 the Cardston creamery had a deficit of \$1,700. A new manager, Mr. McIntosh, was appointed in February, 1913. Up until the end of June the butter from this factory graded about one-half "first" and the balance "second" and "off grades." Mr. McIntosh asked the board of directors if he might grade all cream in three grades, first grade cream to be paid for at the rate of 4 cents more than the second grade, and that "third" or "off grade" cream be returned to the producer. This suggestion was granted and at the end of the first month the shipments graded 75 per cent "firsts."

At this time the Alberta department of agriculture started a new grade standard. All butter grading 39 points or over was classed as "special" that grading 37 points and over for flavor

**Children Cry
FOR FLETCHER'S
CASTORIA**

To Printers and Publishers:

We beg to announce that we have started in the business of typesetting for the trade only. We have one of the best linotype plants in the west, and can guarantee a production of 300,000 ems per day; customers can rely upon a prompt delivery of all copy sent in. We quote you the following scale of prices for solid or leaded matter read and corrected:

6 point	45c per 1000 ems.
7 point	50c per 1000 ems.
10 point	55c per 1000 ems.
12 point	60c per 1000 ems.

For 250,000 ems and over we cut 10c per 1000 off the above prices.

Customers are charged 12c per pound for metal, which amount will be refunded when the metal is returned, less 1c per pound for waste and deterioration.

and otherwise well made and packed was classed as "first"; 35 points and over was "second"; and all under 35 was "off grade."

The first shipment from the Cardston creamery in the month of August, amounting to some 4,000 pounds, had 60 per cent of it graded "special" and brought 25 cents a pound. Another 25 per cent, graded "first" and sold for 25 cents a pound, and the balance went "second" and brought only 25 cents a pound. This looked good to the butter maker, and he continued grading carefully, till in the first week in September the climax was reached when Mr. McIntosh had 95 per cent in "specials," 2.5 in "firsts," and 2.5 in "seconds."

Cardston creamery now has paid all its indebtedness of \$2,700, besides meeting all running expenses, and has a surplus to begin on next season. This was done in the face of stiff competition from a creamery in a nearby town, and from a city dairy 60 miles away with good railway facilities for shipping cream, but Cardston creamery never lost a patron.

Dr. E. F. Lake, of Denver, finds radium a failure as a cure for a cancer with which he is afflicted.

BOOTH BELIEVES SOLDIERS WILL NOT BE NEEDED

No Suggestion of Militia Yet
—Police Will Arrest All
Trouble Makers.

DON'T LIKE IDEA
OF "PRISON" FARM

Commissioners Points Out
That No More Prisoners
Will Be Sent.

James Rowan and H. McDonald, representing the Industrial Workers of the World, interviewed Commissioner Booth for two hours yesterday afternoon between five and seven o'clock.

The men demanded that positions be found at a reasonable wage for all the unemployed in the city. They stated that they should be so well paid that had branch in practically every city in Canada and the United States, and threatened to bring 10,000 men to Edmonton from other cities in western Canada if the city and provincial authorities did not do something to relieve the conditions that prevailed.

Commissioner Booth told the men that it was impossible to guarantee them any wages but in a case where the men were starving the city would take care of them.

"In your parade this afternoon there were a large number of floaters, and we cannot get jobs for every man that comes to town during the last week, or day," stated the commissioner.

The delegation left with the assurance that only the men who were very deserving and who had been here for some considerable time would be provided for by the city.

It was reported this morning that there was a possibility of the militia being called out, but Commissioner Booth, when interviewed by a representative of the Capital early this morning, stated that there had been no suggestion of calling out the militia.

"There will be no trouble, to my mind, that the police cannot easily handle. Those desiring work can go to the city farm, and if there is any trouble they will be arrested and sent there or out of the city," he said.

A representative of the I.W.W.'s told me yesterday that the men would not go to the city farm because it was called a "prison" farm. If it is decided to send these men to the farms there will be no more prisoners sent and anyway the guards at the farm work as hard as the prisoners. We will send them out in wagons, too."

**THE MILKY WAY IS
BUSY THOROUGHFARE
WITH MODERN METHODS**

No sooner is one dairy cownthroned with a remarkable record to her credit than she is forced to withdraw in favor of some one of her rivals. The Holstein Friesian promoters have reason to be proud of the wonderful record made by the famous cow, Hattie Hella De Kol whose record of 27,404 pounds of milk and 1,958.34 pounds of butter fat in one year made a world's record. While not a close competitor in the question of milk, May Billa, a Pennsylvania Guernsey, has gone a pound and a quarter better than Hattie Hella De Kol in the production of butter-fat, and makes a new world's record with 1,945.59 pounds in 345 days. Her milk record for that period was 19,529.4 pounds.

There is certainly something doing these days along the milky way.

Commercial Aeroplaning
San Francisco, May 15.—Aeroplane passenger service across San Francisco Bay from this city to Oakland was instituted yesterday, with a regular schedule of trips. Major James Roth, Jr., was the first passenger carried, making the round trip. The distance between the terminals is a little over six miles.

Mill Creek Gala Day
The East Mill Creek Ratepayers' association are planning an interesting program for their gala day celebrations on Empire day, May 25. Particulars will be announced later.

DOAN'S KIDNEY PILLS

Are The Original Pill For The Cure Of Backache, Lame Back, Weak Back Or Any Other Kidney Trouble.

The fact that Doan's Kidney Pills are the original Kidney Pills has not prevented the placing of other preparations in pill form upon the market under the name Kidney Pills. It is necessary, therefore, that all wishing to secure the curative effects which have made Doan's Kidney Pills so popular everywhere, should see that the trade mark, the Maple Leaf, appears on the wrapper. Without this trade mark you are not getting the genuine Kidney Pills as originally prepared before the people by Mr. James Doan, as shown by the following declaration:

**PROFESSIONAL OF CANADA,
PROVINCE OF ONTARIO,
TO WIT:**
In the matter of Doan's Kidney Pills, I, James Doan, of Kingsville, in the County of Essex, do solemnly declare that Doan's Kidney Pills were first manufactured and sold by me on the 14th day of February, A.D., 1885.

And I make this solemn declaration conscientiously believing the same to be true and knowing it is of the same force and effect as if made under oath and by virtue of "The Canada Evidence Act, 1903."

Declared before me at Kingsville, in the County of Essex, this 27th day of July, A.D., 1909.

W. A. Smith, A Commissioner, etc. Price, 25c a box, or 3 for \$1.25, at all dealers, or mailed direct on receipt of price by The T. Millburn Co., Limited, Toronto, Ont.

SUNDAY NIGHT'S CONCERT AT EMPRESS THEATER TO BE POPULAR ONE

The program to be given by the Citizens' band at the Empress theater Sunday night is an exceptionally good one containing as it does, classical as well as popular music. The last item on the program is very humorous and patrons will take it for granted that the classical and musical effects are really part of the piece. It is descriptive of a party of men going home in the "evening hours" with "jag" on. Following is the program:

O Canada
March, "Distant Greetings"..... Daring
Waltz, "December"..... Godin
Overture, "Fra Diavolo"..... Aubert
Vocal Solo, selected..... Miss Webber
Medley Overture, "Songs of Scotland"..... Wakefield
Humoresque, "What's the Matter with Father"..... Lampe

POOR PAINTERS OF PARIS STARVE; EFFACED BY RICH

Paris, May 15.—The other day a young polish painter died of starvation in the Latin quarter. He had not partaken of food in forty-eight hours. Why this should be so will perhaps be understood when it is stated that upwards of 10,000 paintings are now being exhibited in one building, the Grand Palais, in connection with the Spring salons.

At the Artistes there are 5,547 canvases; at the Beaux Arts salon under the same roof there are more than 4,000. Most of this overwhelming flood of pictures is produced within a few square miles on the left bank of the river Seine and nowhere in the world the struggle for life so keen and bitter as in this hive of artistic activity.

Thousands of hungry artists—American, English, French, German, in fact of every nationality—are now despairing over the fearful output of paintings which annually flood the markets, making it more and more difficult for new men to earn a living. In addition to the piles of canvases exhibited in the Grand Palais there are dozens of other important shows given in Paris yearly, and it is computed that not less than 25,000 new paintings are produced yearly in Paris alone.

Hating men bitterly complain of the fact that most of the available wall space in the exhibition halls is occupied by wealthy artists of established reputation, which has the effect of crowding out the works of newcomers.

The worst feature of this state of things is the repulsive painter, having gratified their vanity by showing the public their works, take the canvases back to their studios and blot them out, while the young men who paint pictures to sell are at their wits' end to reach the public.

Americans are overcoming this difficulty this year by organizing a purely American exhibition to be held next fall whereat young men will be welcomed.

TEMPERANCE WAVE WILL SWEEP OVER WESTERN PROVINCES

That a wave of temperance is sweeping over Canada from the far east maritime provinces to Alberta in the west, and that inside of five years Alberta, like Ontario, will be abolishing bars instead of adding to them, is the statement of G. O. Edwards, prominent temperance worker of St. John, N.B., who is a visitor in the city today. "The temperance people are sure to win out in their fight for the abolition of the bar," said Mr. Edwards.

Mr. Edwards stated that in some of the provinces in the east where he came from there was a Scott act rule, and that it worked to satisfaction. For the first offence of selling liquor a heavy fine is imposed, and for the second and third offences offenders are put in jail, and even women who break the liquor-selling law are dealt with severely.

When asked his opinion as to the probable outcome of the temperance campaign for this province as proposed for next year, Mr. Edwards said: "The temperance cause of Alberta will win out. The stores, factories and railroads of this province, with their thousands of employees, are now getting so they will not have a man in their employ who is addicted to drink, because a man's efficiency is lessened by half, if he is even a moderate drinker." Mr. Edwards stated that the efforts of the temperance people in this province might well be directed along the lines of construction of the railroads, where the absence of liquor was necessary to good work among such a large number of men.

HOLSTEINS HEAD THE LIST APPLICATIONS PERFORMANCE RECORD

The following number of cows of the several breeds of dairy cattle have qualified for registration in the Record of Performance, according to report No. 8, issued by the Live Stock Branch, Ottawa.—Ayrshire 325, Holstein-Friesian 37, Guernsey 12, French Canadian 21 and Jersey 33. The bulls which qualified in having four daughters in the Record of Performance, each from a different dam, consisted of 15 Ayrshire and 10 Holsteins.

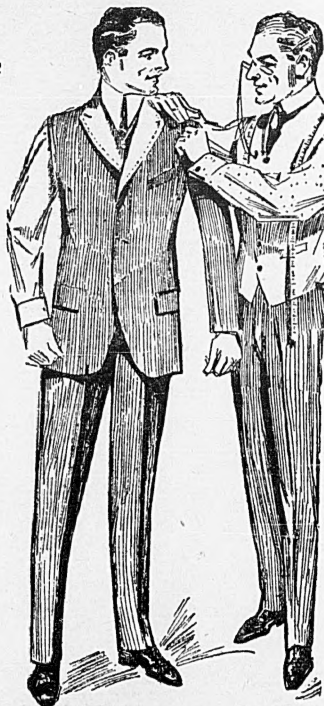

This report contains the regulations governing the work, the standards for registration for the different breeds, and the records of cows that have obtained certificates of the Record of Performance. A copy of this report can be obtained by making application to the Publications Branch, Department of Agriculture, Ottawa.

Debate Oriental Question

The Eureka boys' club and the girls' guild of the Highland Park mission, school, will meet tonight in a debate on the subject: "Should orientals be excluded from Canada." The debate will commence at eight o'clock, sharp. A good program has been arranged.

GUARANTEED = TAILORING =

To Measure
at Less
Than
You'd
Pay for a
Guess-fit
Ready-
Made

THESE are the days
when a man
wants his clothes
without long waiting;
and to this end we endeavor to give our customers their clothes in as short a time as possible—robbing the ready-made guss-fit clothes of its only claim to one's consideration.

Why Is It That You Can Produce a Handsome Made-to-Measure Suit Like this for \$19?

—this is a question that we are often asked. Our answer is this: 'We specialize—do nothing else, make nothing else, think of nothing else but making the best suits and overcoats we can possibly produce to measure at \$19.

Always
\$19
To-Measure

We buy for five branches from the mills in mill lots at mill prices. Every yard of goods may be absolutely relied upon for quality and service; every pattern for newness; and our price undersells every other tailor and even the ready-made guss-fitter.

All fabrics (Woolens, canvas, hair cloth, etc.) are thoroughly shrunk in cold water and all garments made by skilled union workmen in our own daylight, sanitary tailor shops.

TIP TOP TAILORS 217 Jasper Ave. East

Head Office: Toronto. Branches: Hamilton, Brantford and Regina

MAIL ORDERS—If you live out of town, write for self measurement form and sample of cloth. We can take your measure by mail and fit you as perfectly as if you came personally.

Westerners on Directorate.

Montreal, May 15.—The work of re-organizing the Atlas Oases Works is well under way. The expected charter of the new company will be gazetted at Ottawa, this week. Capital has been placed at \$3,000,000. A strong directorate has been secured.

for the new concern, including in Canada

Mr. D. C. Cameron, Winnipeg; A. W. Fraser, K.C., Ottawa; Hon. George T. Blinair; G. T. Somers, president of the Sterling bank; and H. B. Bennett, M.P.

Degree Practice.

Jewel Rebecca Lodge, No. 23, will hold a degree practice tomorrow afternoon at three o'clock, in the L.O.O.F. hall, Norwood boulevard.

Beaknechewan has a land area of 155,744,459 acres.

WOULD MEN BE DEVOUCERS NOT DESTROYERS

Magrath Shows How Ten Million Dollars Might Be Spent Differently.

APPARENTLY STARTS DELEGATES THINKING

Get Better and Bigger Idea of Alberta and Resources Than Ever.

W. J. Magrath, president of the Edmonton industrial association, who was perhaps the principal speaker in North America at the western Canada colonization and development convention yesterday, made a speech which greatly interested those present.

Mr. Magrath spoke on "Manufacture in Alberta—Its Growth and Importance" and seemed to hit the very nerve of the colonization and development problem in the west, when he stated that if the dominion government had used the \$100,000,000 fund appropriated for armaments recently, in buying live stock and distributing it among the brainy young men of western Canada, thus tending to make them producers instead of destroyers, it would be much better for everyone concerned.

This part of Mr. Magrath's speech apparently set a large number of the delegates to the convention thinking, and it is not improbable that some concrete action may be taken along the lines suggested.

The president of the industrial association made a very optimistic address on the future of Alberta. He opened the eyes of even a large number of those present who had previously seen a lot about this province, particularly when he quoted figures of the resources and the statement of the dominion government that Alberta could supply, without outside help, 50,000,000 people if organized and efficient action were correctly taken.

When Mr. Magrath referred to the \$100,000,000 being sunk in armaments all the dominion government had to do was to buy live stock and distribute it among the brainy young men of western Canada, thus tending to make them producers instead of destroyers, it would be much better for everyone concerned.

This part of Mr. Magrath's speech apparently set a large number of the delegates to the convention thinking, and it is not improbable that some concrete action may be taken along the lines suggested.

The president of the industrial association made a very optimistic address on the future of Alberta. He opened the eyes of even a large number of those present who had previously seen a lot about this province, particularly when he quoted figures of the resources and the statement of the dominion government that Alberta could supply, without outside help, 50,000,000 people if organized and efficient action were correctly taken.

When Mr. Magrath referred to the \$100,000,000 being sunk in armaments all the dominion government had to do was to buy live stock and distribute it among the brainy young men of western Canada, thus tending to make them producers instead of destroyers, it would be much better for everyone concerned.

TEN MEN KILLED AND THREE ARE HORRIBLY HURT IN EXPLOSION!

Detroit, Mich., May 15.—Ten men were killed and three terribly injured in an explosion this afternoon which blew the plant of the Mexican Cattle Rubber company to pieces. There were about 25 employees working in the plant. Eleven survivors have been accounted for. Gasoline is believed to have been responsible for the explosion.

Most of the victims were killed mechanically. One body was blown through the building. Three other bodies were burned beyond recognition. Three men were removed to a hospital and physicians said they did not expect any of the men to survive. Experts of windows in the building said the rubber company's plant was shattered.

There were several reports as to the cause of the explosion. One said it was a gas leak. Another said it was a lightning strike. A third said it was a defective fuse. The cause of the explosion is still under investigation.

The plant, a one-story concrete building, in West Detroit, was almost obliterated. Flying chunks of substance filled adjoining buildings and concrete blocks weighing many pounds were hurled more than two blocks.

The factory of Commerce Motor Car company, about 100 feet from the rubber concern, was badly damaged. Nobody in the building, however, was seriously hurt.

The explosion was witnessed by scores of pedestrians and there were many narrow escapes. One man told the police he heard a roar—the rubber factory seemed to split in three huge pieces, two of which "melted away" the third, he said, shot high into the air, breaking in two and fragments went whizzing in every direction.

The building was considered fireproof and the firemen soon prevented the possibility of a conflagration. None of the first five bodies removed from the scene were identified by the police.

Several hours after the accident it was still impossible to learn the cause of the explosion. It is estimated that the number of dead, all of the employees could not be accounted for and this led to reports that possibly 14 had been killed.

Arrangements for Big Capture of Animals Running in South.

THREE HUNDRED HEAD WILL BE ROPED IN

Government Plans to Dispose of Them by Public Auction.

A big round up of wild and stray horses on the Blood Indian reserve in southern Alberta, commencing on Monday next has been organized. It is expected that the round-up will occupy about ten days. The Blood Indian reserve is some 1,500 square miles in extent, being about 10 miles in length from north to south and from 14 to 25 miles in width. It is estimated that there are some 300 head of horses running wild on the reserve. It is ten years since the last round-up took place and at that time there was a low under which the horses could be disposed of, when caught if the owners did not claim them. The only thing that could be done at that time was to turn the horses loose again in the foothills, which was done near Colesburg.

Will Be Sold at Auction.

Under the Dominion Lands Act passed by the Alberta legislature last session, power is given to the minister of agriculture to dispose of the animals for which the owners are found by selling them at public auction. Of the 300 horses now running wild on the reserve it is expected that owners will be found for all except about 75 head. Indians will be employed as riders by the men in charge of the round-up. The animals found straying on the reserve will be impounded by the Indian agent. Arrangements are now being made for the establishment of a pound.

Improved Cultivation.

W. F. Stevens, live stock commissioner for Alberta, who has just returned from the south, where he has been in connection with the forthcoming round-up on the Blood Indian reserve, and pound district matters in the Cypress Hills country states that there is a good supply of moisture in the ground for the young growing crops which are coming along fine. The land is in excellent condition and is being exceptionally well farmed. In the older settlements the amount of land under cultivation is being steadily increased. The amount of land under cultivation is being steadily increased. The amount of land under cultivation is being steadily increased.

SETTLE PARLIAMENTARY DIFFERENCES WITH THE DUELLO IN HUNGARY

Budapest, May 15.—Count Stephen Tica, the Hungarian premier, yesterday challenged to a duel Stephen Rakovits, a fellow countryman, after a lively altercation in a committee room of the Hungarian parliament. Seconds were at once appointed.

Manage Polo Team.

London, May 15.—Captain Edwards Dan, M.P., formerly of the seventh Lancashire was today appointed manager of the International Polo team which is to play during the Panama Pacific exposition at San Francisco in 1915.

Canadian is President.

Canadian is President.

Philadelphia, May 15.—Cincinnati was chosen as the next meet for a world's cup polo contest, and new officers were elected at the final annual convention of the American Water polo association here yesterday. Oscar Mueller, of Scranton, Pa., was chosen president.

The late government, he said was quite justified in giving aid to link up the system in the prairie provinces with the industrial centers of the east but the British Columbia enterprise should not have been undertaken without the aid of the federal government.

He claimed that the government had not received any real security for the guarantee given to the C. N. R. E. Reitel, of Toronto moved the adjournment of the debate.

MAJOR GENERAL LEONARD A. WOOD.

CRACKS APPEAR IN FOUNDATION WALLS OF CHURCH

St. Andrew's Parish Claims \$27,500 From City on Account of Damage.

ARCHITECT STATES STRUCTURE IN DANGER

Judge Decides City is Immune in Carrying out Street Improvements.

An important decision was given by Hon. Mr. Justice Stuart in the supreme court today in dismissing the claim of the St. Andrew's parish church for \$27,500 for damages which it was alleged had been caused by their church building by the city excavating a road way past the church. Evidence was given on behalf of the plaintiffs tending to show that cracks which have appeared in the foundation walls of the church had been caused by the excavation of the road.

By the judgment, Mr. Justice Stuart practically decided that the city is immune from damage claims in respect to existing buildings in carrying out necessary street improvements. The city put up the defense that the road running past the church and known as the Baldwin Hill road has been in use as a highway the past 20 years and was therefore not a new street lately opened up. Plaintiffs must have expected that improvements would be made to the road and should have prepared for them.

Structure in Danger.

The church was built in 1910 and the improvements to the road were begun in 1911. The church was built in 1910 and the improvements to the road were begun in 1911. The church was built in 1910 and the improvements to the road were begun in 1911.

While dismissing the action for damages the court also gave judgment that the plaintiffs are not entitled to the removal of earth from the side of the property. The church is built on a hill and the removal of earth from the side of the property would be dangerous.

PEOPLE APPLYING FOR WORK SHOULD GO TO TURNBULL

Booth Wants City Jobs Done in Two Six-Hour Shifts Daily.

GETTING LIST OF CITY'S UNEMPLOYED

Rowan Says Men Working for Board and Room Would Become Worse Off

"Give Relief Officer T. H. Turnbull has received a number of offers from farmers to give work to the unemployed. Some will pay wages and some offer only board and room. The civic relief officer offered these positions to several of the men who made the offer and not in one single instance did the men avail themselves of the opportunity," stated Commissioner Booth of safety and health this morning at the commissioners meeting.

"By bringing them here last year and feeding them we made an open wound," said Commissioner Saunders.

"Well, we are making them work for what they get this time," replied Commissioner Booth.

To Advertise for Relief.

Upon motion of Commissioner Booth it was decided to insert advertisements in the daily papers requesting that owners of vacant property in the city, who are willing to have the same filled by any deserving family, notify the civic relief officer and work will be given to these men with preference to married men and those who are deserving citizens. The city will supply seed free and play the lot. Where property has been subdivided the survey stakes will not be molested.

A list will be submitted at the next meeting of the city commissioners by Commissioner Booth showing the number of families in need of work who are out of employment, the length of time in the city, whether married or single and also showing the number of "floaters" who have arrived but recently.

Extra Special Offers in Women's Ready-to-Wear

Women and Misses May Choose from a Great Collection of \$15, \$18 and \$20 Suits Saturday at \$9.50

Every woman obtaining one of these suits will congratulate herself upon being saved a considerable portion of the regular price—and she will also have the satisfaction of having gotten a handsome stylish suit. They are all elegant models, mostly in novelty effects, made of tweeds, Bedford cords and repps. There is also included quite a collection of black and navy-styled serge. **\$9.50** suits at the same price. Saturday

Women's Wash Dresses and Silk Messaline Dresses at \$5 The Price Being Much Less than the Value

Here is a group of dresses that should interest every woman needing a summer frock. It includes a half dozen different kinds of New York model wash dresses made of crepe and voiles trimmed in attractive effects; also eight different styles of pure silk messaline dresses in navy, brown, black and sage. The latter have the drop shoulders and are prettily trimmed with laces, contrasting material, etc. The sizes are 14 to 42. Every dress in the lot a better than usual value for. **\$5.00**

Women's Tweed Skirts at the Remarkable Price of \$1

This is such an unusual price that you probably will wonder what the skirts can be like. You may accept our assurance that they are really worth while coming down for. Made of grey, heather and brown mixtures of a good, serviceable tweed fabric. Two-piece style and trimmed with fancy self-covered buttons. Our regular price is \$2.15—Saturday **\$1.00** Special

WHAT GRADING CREAM DID FOR ALBERTA FIRM

Keen Competition of New Zealand Butter Forced Creamery Men to Seek Remedy

PAID OFF DEFICIT
AND NOW HAS SURPLUS

Alberta Department of Agriculture Showed Way Out of Difficulties.

The keen competition which Alberta creamery butter met from New Zealand butter on the markets of the Pacific coast during 1912 resulted in certain of the Alberta creameries having to record a deficit for that year, on account of having produced considerable second class butter. This had the effect of stirring up new ideas for improved work in 1913. The example set by the manager of the Cardston creamery shows what can be done in the way of securing results when the proper method is employed.

At the close of the year 1912 the Cardston creamery had a deficit of \$2,700. A new manager, Mr. McIntosh, was appointed in February, 1913. Up until the end of June the butter from this factory graded about one-half "first" and the balance "second" and "off grades." Mr. McIntosh asked his board of directors if he might grade all cream in three grades, and all under 35 cents to be paid for at the rate of 4 cents more than the second grade, and the "third" or "off" grade cream to be returned to the producer. This suggestion was granted and at the end of the first month the shipments graded 75 per cent "firsts."

At this time the Alberta department of agriculture started a new grade standard. All butter grading 35 points or over was classed as "special," that grading 27 points and over for flavor

Children Cry
FOR FLETCHER'S
CASTORIA

To Printers and Publishers:

We beg to announce that we have started in the business of typesetting for the trade only. We have one of the best linotype plants in the west, and can guarantee a production of 300,000 ems per day; customers can rely upon a prompt delivery of all copy sent in. We quote you the following scale of prices for solid or leaded matter read and corrected:

6 point	45c per 1000 ems.
7 point	50c per 1000 ems.
10 point	55c per 1000 ems.
12 point	60c per 1000 ems.

For 250,000 ems and over we cut 10c per 1000 off the above prices.

Customers are charged 12c per pound for metal, which amount will be refunded when the metal is returned, less 1c per pound for waste and deterioration.

L. M. GARRISON

Who is included in practically all of the war conferences now going on in Washington.

and otherwise well made and packed was classed as "first"; 35 points and over was "second"; and all under 35 was "off grade."

The first shipment from the Cardston creamery in the month of August, amounting to some 4,000 pounds, had 60 per cent. of it graded "special" and brought 28 cents a pound. Another 30 per cent. graded "first" and sold for 25 cents a pound, and the balance "second" and "off grades," Mr. McIntosh asked his board of directors if he might grade all cream in three grades, and all under 35 cents to be paid for at the rate of 4 cents more than the second grade, and the "third" or "off" grade cream to be returned to the producer. This suggestion was granted and at the end of the first month the shipments graded 75 per cent "firsts."

Dr. E. F. Lake, of Denver, finds radium a failure as a cure for a cancer when which he is afflicted.

BOOTH BELIEVES SOLDIERS WILL NOT BE NEEDED

No Suggestion of Militia Yet
—Police Will Arrest All
Trouble Makers.

DON'T LIKE IDEA
OF "PRISON" FARM

Commissioners Points Out
That No More Prisoners
Will Be Sent.

James Rowan and H. McDonald, representing the Industrial Workers of the World, interviewed Commissioner Booth for two hours yesterday afternoon between five and seven o'clock.

The men demanded that positions be found at a reasonable wage for all the unemployed in the city. They stated that they belonged to an organization that had branches in practically every city in Canada and the United States, and threatened to bring 10,000 men to Edmonton from other cities in western Canada if the city and provincial authorities did not do something to relieve the conditions that prevailed.

Commissioner Booth told the men that it was impossible to guarantee them any wages but in a case where the men were starving the city would take care of them.

"In your parade this afternoon there were a large number of floaters, and we cannot get jobs for every man that came into town during the last week or day," stated the commissioner.

The delegation left with the assurance that only the men who were very deserving and who had been here for some considerable time would be provided for by the city.

It was reported this morning that there was a possibility of the militia being called out. Commissioner Booth, when interviewed by a representative of the Capital early this morning, stated that there had been no suggestion of calling out the militia.

"There will be no trouble, to my mind, that the police cannot easily handle. Those desiring work can go to the city farm, and if there is any fully, till in the first week in September the climax was reached when Mr. McIntosh had 95 per cent. in "specials," 25 in "firsts," and 25 in "seconds."

Cardston creamery now has paid all its indebtedness of \$2,700, besides meeting all running expenses, and has a surplus to begin on next season. This was done in the face of stiff competition from a creamery in a nearby town, and from a city dairy 40 miles away with good railway facilities for shipping cream, but Cardston creamery never lost a patron.

THE MILKY WAY IS BUSY THOROUGHFARE WITH MODERN METHODS

No sooner is one dairy queen enthroned than she is forced to withdraw in favor of some one of her rivals.

The Holstein Friesian promoters have been proud of the wonderful record made by the famous cow, Hansette Bella De Kol whose record of 27,494 pounds of milk and 1,058.34 pounds of butter fat in one year made a world's record. While not a close competitor in the question of milk, May Hilma, a Pennsylvania Guernsey, has gone a pound and a quarter better than Hansette Bella De Kol in the production of butter-fat, and makes a new world's record with 1,059.53 pounds in 365 days. Her milk record for that period was 33,525 pounds.

There is certainly something doing these days along the milky way.

Commercial Aeroplaning
San Francisco, May 15.—Aeroplane passenger service across San Francisco bay from this city to Oakland was instituted yesterday, with a regular schedule of trips, Master James Boller Jr. was the first passenger carried, making the round trip. The distance between the terminals is a little over six miles.

Mill Creek Gale Day
The East Mill Creek Ratepayers' association are planning an interesting program for their gala day celebrations on Empire day, May 25. Particulars will be announced later.

DOAN'S KIDNEY PILLS

Are the Original Pill For The Cure Of Backache, Lame Back, Weak Back Or Any Other Kidney Trouble.

The fact that Doan's Kidney Pills are the original Kidney Pills has not prevented the placing of other preparations in pill form upon the market under the name Kidney Pills. It is necessary, therefore, that all wishing to secure the curative effects which have made Doan's Kidney Pills so popular everywhere should see that the trade mark, the Maple Leaf, appears on the wrapper. Without this trade mark you are not getting the genuine Kidney Pills as originally placed before the people by Dr. James C. Doan, as shown by the following declaration:

DOMINION OF CANADA,
PROVINCE OF ONTARIO.
To Wit:
In the matter of Doan's Kidney Pills.
I, James C. Doan, of Kingsville, in the County of Essex, Druggist, do solemnly declare that Doan's Kidney Pills were first manufactured and sold by me on the 14th day of February, A.D., 1885.
And I make this solemn declaration conscientiously believing the same to be true, and knowing it is of the same force and effect as if made under oath and by virtue of "The Canada Evidence Act, 1901."

SUNDAY NIGHT'S CONCERT AT EMPRESS THEATER TO BE POPULAR ONE

The program to be given by the Citizens' band at the Empress Theater Sunday night is an exceptionally good one containing as it does, classical as well as popular music. The last item on the program is a very humorous and satirical will take it for granted that the discords and comical effects are really part of the piece. It is a description of a party of men going home in the "wee sma' hours" with a "lag" on. Follows is the program:

O Canada.
March, "Distant Greetings".... Darling Waltz, "December"..... Gordin Overture, "Fra Diavolo"..... Auber Vocal Solo, selected..... Miss Webber Medley Overture, "Songs of Scotland"..... Wakefield Humoresque, "What's the Matter with Father"..... Lamps

POOR PAINTERS OF PARIS STARVE: EFFACED BY RICH

Paris, May 15.—The other day a young polish painter died of starvation in the Latin quarter. He had not parition of food in forty-eight hours. Why this should be so will perhaps be understood when it is stated that upwards of 10,000 paintings are now being exhibited in one building, the Grand Palais, in connection with the Spring salons.

At the Artistes there are 5,247 canvases, at the Beaux Arts salon under the same roof there are more than 4,000. Most of this overwhelming flood of pictures is produced within a few square miles on the left bank of the river Seine and nowhere in the world is the struggle for life so keen and bitter as in this hive of artistic activity.

Thousands of hungry artists—American, English, French, German, in fact of every nationality—are now despairing over the feverish output of painters which annually flood the market, making it more and more difficult for new men to earn a living. In addition to the millions of canvases exhibited in the Grand Palais there are dozens of other important shows given in Paris yearly, and it is computed that not less than 25,000 new paintings are produced yearly in Paris alone.

Rising men bitterly complain of the fact that most of the available wall space in the exhibition halls is occupied by wealthy artists of established reputation, which has the effect of crowding out the works of newcomers. The worst feature of this state of things is that reputable painters, having gratified their vanity by showing the public their works, take the canvases back to their studios and blot them out, while the young men who paint pictures to sell are at their wit's end to reach the public.

Americans are overcoming this difficulty this year by organizing a purely American exhibition to be held next fall, whereas young men will be well-served.

TEMPERANCE WAVE WILL SWEEP OVER WESTERN PROVINCES

That a wave of temperance is sweeping over Canada from the far east maritime provinces to Alberta in the west, and that inside of five years Alberta, like Ontario, will be abolishing bars instead of adding to them, is the statement of G. G. Edwards, a prominent temperance worker of St. John, N.B., who is a visitor in the city today. "The temperance people are going to win out in their fight for the abolition of the bar," said Mr. Edwards.

Mr. Edwards stated that in some of the provinces in the east where he came from there was a Scott act rule, and that it worked to satisfaction. For the first offence of selling liquor a heavy fine is imposed, and for the second and third offence offenders are put in jail, and even women who break the liquor-selling law are dealt with severely.

HOLSTEINS HEAD THE LIST APPLICATIONS PERFORMANCE RECORD

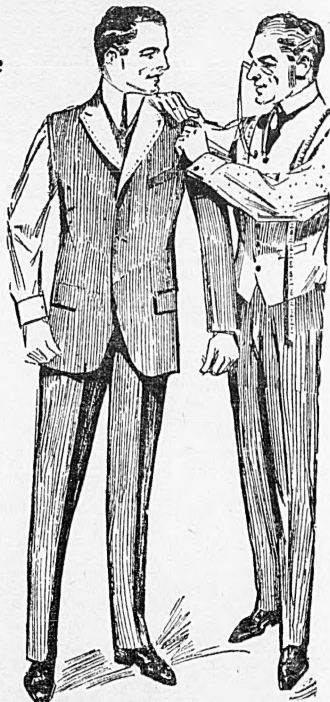

The following number of cows of the several breeds of dairy cattle have qualified for registration in the Record of Performance, according to report No. 5, issued by the Live Stock Branch, Ottawa—Ayrshire 325, Holstein-Friesian 417, Guernsey 18, French Canadian 21 and Jersey 25. The bulls which qualified on having four daughters in the Record of Performance, each from a different dam, consisted of 15 Ayrshire and 10 Holsteins.

This report contains the regulations governing the work, the standards for registration for the different breeds and the records of cows that have obtained certificates of the Record of Performance. A copy of this report can be obtained by making application to the Publications Branch, Department of Agriculture, Ottawa.

Debate Oriental Question
The Europa boys' club and the girls' guild of the Highland Park mission, south side, will meet tonight in a debate on the subject: "Should originals be excluded from Canada." The debate will commence at eight o'clock sharp. A good program has been arranged.

GUARANTEED = TAILORING =

To Measure
at Less
Than
You'd
Pay for a
Guess-fit
Ready-
Made

THESE are the days when a man wants his clothes without long waiting; and to this end we endeavor to give our customers their clothes in as short a time as possible — robbing the ready-made guss-fit clothes of its only claim to one's consideration.

Why Is It That You Can Produce a Handsome Made-to-Measure Suit Like this for \$19?

—this is a question that we are often asked. Our answer is this: We specialize—do nothing else, make nothing else, think of nothing else but making the best suits and overcoats we can possibly produce to measure at \$19.

We buy for five branches from the mills in mill lots at mill prices. Every yard of goods may be absolutely relied upon for quality and service; every pattern for newness; and our price undersells every other tailor and even the ready-made guess fitter.

All fabrics (Woolens, canvas, hair cloth, etc.) are thoroughly shrunk in cold water—and all garments made by skilled union workmen in our own daylight, sanitary tailor shops.
